

Les troubles de la reconnaissance visuelle :

- **Agnosie d'objet**
- **Simultagnosies**
- **Agnosie des couleurs**
- **Prosopagnosie (ou agnosie des visages)**

AGNOSIE

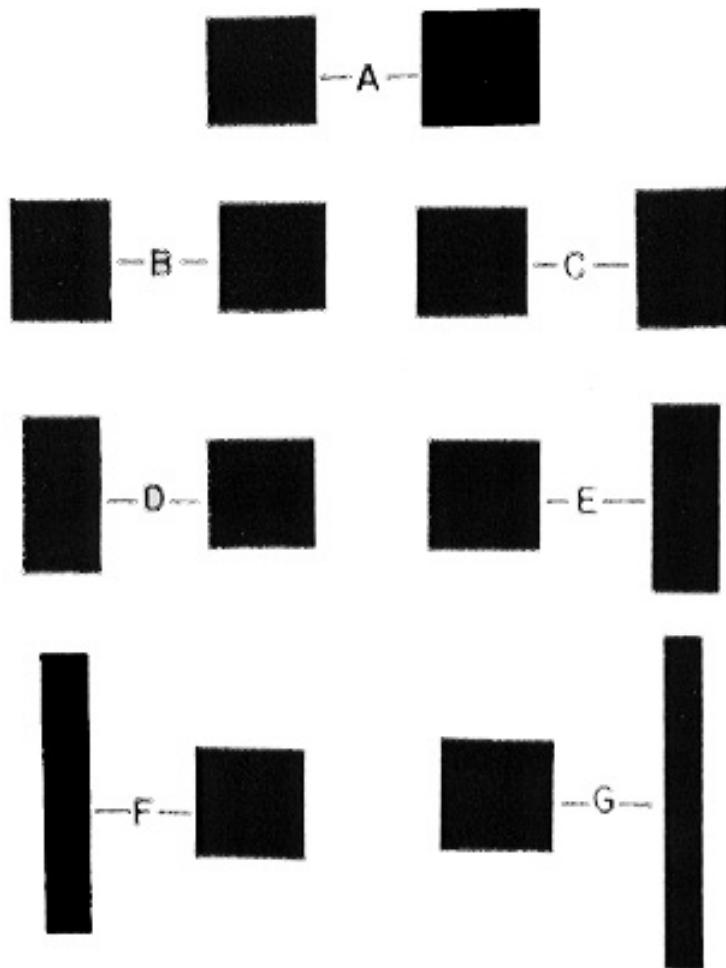

- Déficience de la RECONNAISSANCE des stimuli
- dans UNE SEULE modalité sensorielle
- sans déficit sensoriel élémentaire,
- ni trouble majeur des autres fonctions cognitives

LISSAUER (1890) :

- Agnosie aperceptive (aperception = « perception consciente d'une impression sensorielle »)
- Agnosie associative

AGNOSIES VISUELLES

- Objets
- Visages
- Couleurs
- Mots
